** ANTARCTICA. 15475.98-RCUSB, Saturday June 12 from tune-in at 1457, LRA36 is back on after absence last Sat and Wed. S5-S7 via Pardinho, Brasil, SDR but quite good with low noise level. Historical talk about Antarctic bases; 1500 ID and music; 1511 ``Nacional Antártida Argentina, en todo el país, la radio pública`` canned ID, repeated at 1515 and 1519 amid musix. 1523 contact info starting with whatsapp, telephone, algo, facebook, e-mail. 1526 historical info, current weather including máximo of -4. 1527 acknowledges listener Manuel Méndez in España (who frequently reports it direct but with very poor strength). 1528 despedida with Antarctica song; mentions Base Marambio. I would really like to see the full lyrix of this song and its name. Does anybody have them? But not off the air yet. 1532.5 on to string of other songs; no further announcements, but 1555 Antártida themesong again and off 1556* (Glenn Hauser, OK, WOR)

** ANTARCTICA. 15475.98-RCUSB, Wed June 16 at 1450 UT tune-in via Pardinho, Brasil KiwiSDR, LRA36 in quite well, with song at S7. Side-tuning to 15475.00-USB, we can confirm there is a carrier, reduced, but in SAM mode not enough to register an exact frequency offset. Usual canned ID which says ``Nacional, Antártida Argentina, en todo el país, la radio pública``, song; 1456 contact info for QSL, then a long announcement about something? 1503 `NAA` ID, this week in world history, for dates June 14, 15, 17, 18. 1506 music. 1512 NAA ID, music; two quick QRMs of rapid clix overriding. 1522 quick weather info including today`s high of 2 grados (not bad for midwinter in Anta, above freezing!); contact info including whatsapp number, phone. 1524 reminds us of Saturday repeat, now fading down into noise level; 1525 Antártida song until 1526*.

Earlier I asked if anyone had the lyrix to it. Manuel Méndez, Spain replied with as much of it as he could copy. Some parts are missing as with [...], notably the opening stanza. No doubt there will be many more chances for native speakers to hear it, or examine old recordings.

``Hi Glenn, this is what I could understand from the Base Esperanza song:

"...Pero el amor a la patria es más fuerte en Base Esperanza,
es por eso este homenaje, para que llene de gloria,
a todos los corazones que llevan en la memoria.
Lágrimas y pañuelos de adiós en la dársena norte dejó
el Irízar*, ese día que partió.

Qué esté atenta y centinela, la base Belgrano 2,
y la base Primavera....

También quiero yo nombrar, porque las llevó el mar,
a Belgrano y Belgrano 3, y la ciencia que nos dió su obra,
el amor por nuestro pueblo, el respeto a la bandera,
por el Comando Antártico Vida, en el confín de la tierra.
Con la fuerza de los vientos, ya salió de Palomar,
con rumbo a Base Marambio, el Hércules, al sur de ....
Lágrimas y pañuelos de adios, en la dársena norte dejó
el Irízar, ese día que partió, que partió."

*El ARA Almirante Irízar (Q-5) (RHAI) es un rompehielos perteneciente
a la Armada Argentina.```

And here is a Google translation I, gh, have slightly improved:

"... But the love of the country is stronger in Base Esperanza,
that is why this tribute, so that it fills with glory,
all the hearts that they carry in their memory.
Tears and goodbye handkerchiefs in the north dock left by
the Irízar *, that day it left.

Be vigilant and on guard, the Belgrano 2 base,
and the Primavera base ....

I also want to name, because the sea took them, the bases
Belgrano and Belgrano 3, and the science that their work gave us,
love for our people, respect for the flag,
by the Antarctic Life Command, at the end of the earth.

With the force of the winds, it has already left Palomar,
Heading to Marambio Base, Hercules, south of ....

Tears and goodbye handkerchiefs in the north dock left by
the Irízar *, that day it left."

* The ARA Almirante Irízar (Q-5) (RHAI) is an icebreaker belonging to
the Argentine Navy.`` (Glenn Hauser, OK, WOR)

** ANTARCTICA [non]. The annual BBCWS mid-winter special of greetings
to inhabitants of British Antarctic stations occurs every year on June
21 at 2130-2200 UT --- AND planned frequencies are tried one week
earlier at 2130-2145, i.e. Monday June 14. Dan Ferguson got the
frequencies, so I was ready for them via Pardinho SP Brasil KiwiSDR,
as there aren`t any in Antarctica; but this one gets LRA36 well.

7305, Woofferton cuts on at 2130 atop else? promo, news HL, 2132 The
Connexion, i.e. testing with what`s on BBCWS now; S9+15/25
6170, Ascension, S9+15/25 equally good
9505, Woofferton, S9+20 but somewhat lower mod, splash de weak 9500?

6035, UAE no signal

Direct to OK, 9505 JBA carrier; 6170 & 6035 nil, 7305 nil or JBA carrier. They all went off circa 2145*. Something is still on 7305; Aoki shows CNR1. It was not a problem in SP while BBC was on. 9500 QRM would also be CNR1. 73, (Glenn Hauser, OK, WOR)

** CANADA. 332-MCW kHz, June 16 at 0601 UT, ND beacon dash and QT from Thunder Bay is audible over nearby IC Wichita; the two with very different audio frequencies, IC higher. I still suffer high local noise level but the storm noise is not too bad tonight, nothing nearby. One other Canadian is copied, as these two high-power make it if any do:

248-MCW kHz, June 16 at 0612 UT, NDB dash and WG, from WinnipeG (Glenn Hauser, OK, WOR)

** CHINA. CNR1 jammer survey, June 10 from 1327 as I am up earlier than usual. There is only one signal heard u.o.s., mostly presumably against Sound of Hope inaudible here. 15340 S8/9+10. No sign of scheduled Romania. I put that on the backup PL-880 to make // comparisons onward, u.o.s.

1328, 15165 also with victim making fast SAH, S8-S9, vs VOA Thailand this hour only
1328, 15130 atop another Chinese: VOA Philippines this hour only
1329, 14980 //
1333, 14900 //, S5-S7
1335, 16100 //, S5-S8
1335, 16160 //, S9/+10
1336, 16300, JBA, //?
1337, 13920, JBA //
1338, 13640 //
1339, 13630 //
1340, 13130 //, S7-S9
1341, 12820 //, S7-S9
1342, 12795 //, S8/9+10
1344, 11785 //, mixing with VOA Philippines

None WOOB just above or below 11 MHz (Glenn Hauser, OK, WOR)

** CHINA. CNR1 jammer survey June 13 from 1446:

13530, June 13 at 1446, JBA Chinese
13020, June 13 at 1447, S8-S9 Chinese
12880, June 13 at 1448, S8-S9 Chinese about = noise level
No carriers found in the 11 or 16 MHz areas (Glenn Hauser, OK, WOR)

** CUBA. 6100, June 11 at 0550, this RHC English channel is off. 6060 is S9+ mostly hum; 6000 & 6165 both S9+20/30 with sufficient modulation; 5040 axually in English too, S9+10/20 but fighting higher storm noise level, none close to OK per Blitzortung. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 11840, June 12 at 0228, S9+10 of almost OC, suptorted trace of mod I suspect be RHC, then match it to 11670 Spanish as the 11840 level improves slightly, mentioning Filatelia show, now or promo? So the 11850 transmitter has moved back to 11840 again; and now the plus/minus 10 kHz parasites are JBA carriers on 11830 & 11850 instead of 11840 & 11860. Is it now centred on 11840 for entire tarde span? Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 6165 // 6000, June 12 at 0243, the two RHC English frequencies are in French! I think; obviously a movie drama or TV soundtrack. Only occasional mumbled dialog, hard to understand, mostly fumbling and other sounds/effects, as the invisible video is mostly carrying the story.

But what is this doing here?!? Same kind of thing caught once before, on a 9 MHz band RHC frequency. Guess maybe they`ve plugged into wrong satellite downlink, tho I`d think terrestrial STLs would be sufficient near Habana. These are of course not // RHC real Spanish on 11670, nor // 5040. There are long stretches with no dialogue; ``back-up beeps`` a couple times, traffic horns. 0258 bit of French dialogue, more SFX, thru 0300 with no break; 0316 recheck still French dialogue.

6165 & 6000 not rechecked until 0543, when they are still far astray from RHC English which is on 6060 // 6100. Now it`s drama in British English, 0545 off-key singing, SFX, seems like soundtrack of horror film. 6165 cuts off at 0553* while 6000 continues 0600+, but at 0605 check, 6000 is also gone.

All this certainly implies that the 6000 & 6165 pair are from one same transmitter site, while 6060 & 6100 are from another, accounting for totally different program feed inputs. BUT, Aoki & EiBi both show 6000 Quivicán, 6165 Bauta; 6060 & 6100 also both Bauta. So we may suspect 6165 now is also really Quivicán.

Something`s always wrong at RHC! (Glenn Hauser, OK, WOR)

** CUBA. 6100 // << 6000 much stronger, June 12 at 1256 but both VP fading into daytime, RHC. EiBi and Aoki show 6000 Quivicán has another hour to run but 6100 Bauta until 1300 (Glenn Hauser, OK, WOR)

** CUBA. 13639 & 13761 approx., June 12 at 1414, RHC F♯ spurblobs at S5-S7 and S5-S6 respectively, out of undermodulated 13700-AM at

S9/+10. Trace on second-order 13578 but not circa 13822. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 11840, June 12 at 2206, once again like yesterday, RHC is here ex-11850, ex-11840, ex-11850, etc., and it`s suptorted. Something`s always wrong at RHC. BTW, 11840 was also Station YHWH`s frequency choice for midday Saturday broadcast until 1830+ as caught by Rick Barton, AZ; before Cuba would be on (Glenn Hauser, OK, WOR)

** CUBA. 6100, June 13 at 0614, S9+10/20 of dead air in English; 6165 OK in English; 6060 English with humbuzz; 6000 off; 5040 in extra Spanish, S9+20/30. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 11530, June 13 at 1701, no Cuban numbers signal when normally scheduled. Nor 11635 at 1820 check. Rick Barton, AZ has been logging these daily but all gone since June 11. 11435 at 1600 not heard June 13. Is the whole operation kaput? Propagation is degraded but still RHC audible on 11760 & 15140 at 1720 (Glenn Hauser, OK, WOR)

** CUBA. 11850, June 14 at 0215, RHC back here ex-11840, ex-11850, ex-11840, etc., but S9+10/20 of dead air; flanked by the JBA parasitic spur carriers on 11840 & 11860. 0446 recheck still on with suptorted modulation and the spurs. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 6060, June 14 at 0216, RHC humbuzz over music, presumably Spanish service at this hour. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 6165, June 15 at 0629, RHC English is S9+20/30 but JBM; 6100 is S9+10/20 and merely undermodulated. 6060, 6000 and 5040 are all off. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 13635 & 13765 approx., June 15 at 1417, F# FMish spurblobs, only VP today out of RHC 13700-AM. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA [non]. 9490.05V, UT Sat June 12 at 0222, R. República announcing `Alternativa`, a joint produxion with R. Martí; outro, I guess. They have been coöperating for some time. Unchecked whether live simulcast but doubt it. Then own sked given as 9-10 pm lunes a miércoles, 9-11 pm jueves a domingo, i.e. 01-02 UT Tue-Thu; 01-03 UT Fri-Mon. Not only off-frequency, this Issoudun, but wavering as I try to measure it, like 9490.045 to 9490.056. Call it 9490.05V (Glenn Hauser, OK, WOR)

** GERMANY [non]. 11850, June 15 at 0633, African language S9 but high

noise level. It`s DW in Hausa via FRANCE at 0630-0700 (Glenn Hauser, OK, WOR)

** KASHMIR [non]. Alfredo Cotroneo of IRRS writes me June 14:

``Hi Glenn, These broadcasts to Africa have now been ended by requests of the sponsoring organisation.

However, we have a new broadcast on 15170 each Tuesday from 1500-1530 beamed to Kashmir. Any reception report will be welcome, and we will pass it on to the broadcaster for answer according to our privacy policy (GDPR applies to EU citizens) at
https://nexus.org/privacy-policy/
We will also issue our own QSL card, but we have a huge backlog, so anyone please bear with us. Bests. Alfredo``

Tuesday only at 1500-1530 on 15170 is the HFCC registered one with 300 kW at 79 degrees from ``Milano``, while the Ugandan ones were allegedly at 149 degrees (Glenn Hauser, OK, WOR)

** KASHMIR [non]. At 1513 UT June 15 posted to the WOR iog:
``[WOR] 15170 IRRS Kashmiri --- 15170, from 1459 June 15, new IRRS clandestine for Kashmir is huge signal into UTwente, low bass talker with noise, music background, occasional English terms mixed into Kashmiri? Now`s the time to hear it until 1530; Tuesdays only? Or precursor of regular broadcast. Glenn Hauser`` A reply:

``Recording using the U. Twente SDR receiver. I was in a Teams meeting but I could hear in the background what I think was the standard Muslim greeting at the start ("As-salamu alaikum"). If I can find the time, I'll review the recording to see what else might be gleaned. -- Richard Langley`` --- then my full report:

15170, Tue June 15 at *1457.5, carrier on, S9+10 into UTwente SDR. 1459 fragment of song, quick IRRS sign-on ID; 1500 drumming and talk in presumed Kashmiri, very deep bass voice, starting with Salaam aleikum. Now up to S9+25. Occasional English words/terms/names as I listen to the whole thing, such as: Hindustani, Kashmiri, Islamic majority, Islamabad; 1506 law & order. There is constant music background and mike noise, in the wind? Or being manhandled. 1510 Kashmiri Civitas -- as Kai Ludwig had suggested; with strumming. 1514 brief switch to a different voice with throat-clearings over and over, and different background music. Soon back to deep voice. 1524 switches to halting English but very hard to understand: social platforms, decide future, want to be independent, decide as a nation, should be part of Pakistan or independent state, people of Kashmir will decide, autonomy, house of parliament, shopkeepers donating, Islam ready for anything. 1526 back to Kashmiri; chopped off air at 1529*.

Tnx to Alfredo Cotroneo of IRRS for advance info June 14 about this broadcast as in my previous report; it had been registered with HFCC as starting last week on Tuesdays only, 79 degree azimuth from somewhere. Kai Ludwig had replied:

``Remember "Radio Free Kashmir", which appeared in May 2020 and was supposed to have a weekly broadcast on Sundays, 0330-0430 on 7355. This was a shortlived venture, in fact I'm not sure if it really made it on air at all. But it was reported as IRRS-brokered, too, and so the question at hand is obvious. These broadcasts in 2020 came (or were supposed to come) from https://kashmircivitas.com
Kai`` (Glenn Hauser, OK, WOR)

** KASHMIR [non]. 15170, Wed June 16 at 1503 check via UTwente, no signal today from new clandestine as reported yesterday. Perhaps it will be on Tuesdays only. As for the language, Arthur Pozner said:

``This was confirmed today in several Asian countries, the language used is Urdu. Target area is Kashmir. Another clandestine broadcast; and the "Uganda" program was cancelled several days ago!`` (Glenn Hauser, OK, WOR)

** KOREA SOUTH. 15575, June 10 at 1324, KBS World Radio so-called NAm service in English is nearing its solsticial peak, a hefty S4-S7 into deep North America, about COVID-19, vax stats in ROK; 1351 in a travelogue about hiking around Jeju Island at sunrise; now it`s S7-S9; 1400 into Korean hour. Most of the year this emission is a JBA carrier or less, because it`s far too high a band for a mostly-dark high-latutude path, but which is now getting max insolation (Glenn Hauser, OK, WORLD OF RADIO 2090)

** NIGERIA [non]. 9890, Radio Yoruba, 19-24 UT via Woofferton UK:

At 1958 UT June 13, Alan Pennington posted to BDXC-UK iog:

``There were a few tweets on Twitter last week about a test transmission Sun 6 June 2100-2200 on 9890 (or 98.90 kHz) with the tag #Yorubaradio e.g.
"We are now ready for the test transmission. It will take place this Sunday 6th June and will run from 2100-2200 UTC. The frequency of the transmission will be 9890 kHz and this is the frequency we would aim to use for the full broadcast. #YorubaRadio." (Yoruba Nation on Twitter June 5) This must be the same station on 9890 at the moment (1945 UTC). 73, Alan``

With a jpg attached, which I have transcribed into text:

``RADIO YORUBA 98.90 KHZ [sic]
BROUGHT TO YOU BY:
WHITE LION [emoji]
Comrade Olayomi Koiki

#Radio_Yoruba to be launched on 6/6/2021
Thanks to Comrade Olayomi Koiki
(AKA #White_Lion) 98.90 KHz

He made this possible. Now the gospel of Yoruba
Nation liberation would continue to be preached for all
to accept the message and bear us witness that
Yoruba Nation must be free.

#SayNo2023Election
#SayNoNigeria

``God bless Oloye Sunday Igboho for volunteering
himself to lead us out of this fraudulent contraption
called Liegeria
God bless Yoruba Nation``.
Comrade Raphael Adewale
OLCC-Texas-USA
5/6/2021``

I was wondering if any of the broadcast would be in English? I am not listening to Yoruba hour after hour, but at 2322 check, 9890 is being narrated in heavily accented English plus music background. Via UTwente. At 2358 anthem? 2359 brief talk and music, off 2359.5* The signal direct had been JBA (gh)

Some earlier discussion of this on the WOR iog:

``9890 June 12 2155 UNKNOWN ENGLAND in Yoruba (?). Does anyone already have name information or who is the broadcast going to? Very good signal here. 250 kW information and 170° azimuth. (Jorge Freitas-B)
https://youtu.be/O8xdCXpMu08
73 Jorge Freitas, Feira de Santana, Bahia 12°14′S 38°58′W - Brasil, Tecsun PL-660, XHDATA, Antenna Delta Loop and LW 20 meters``

``Hi Jorge, Thanks. Very interesting! This station is regarding Nigeria and support for an independent Yoruba Nation. Please see -
https://www.youtube.com/watch?v=8MX-yNNlxks
Also check out Koiki Media, at
https://koikimedia.com/
See picture at

"Radio test transmission + update on fuläni Herdsmen crisis carryout across Yorubaland"

"USA Mega Yoruba nation Rally Washington DC," held yesterday (not "mega," hi).
https://www.youtube.com/watch?v=ohxvq293icI

The issue of Yoruba independence seems to be a very active matter just now. Ron Howard``

``Thanks, Ron. Will listen out for them today. The desire of independence for Yorubaland is not dissimilar to that of the Igbos in Biafraland. Like many former British colonies, different ethnic groupings of people (some with long-standing animosities) were forced together to make a "new" country. Richard B. Langley``

``Hi Richard, Funny you should mention Biafra, as yesterday in London, they held a joint Yoruba/Biafra rally. Is a very active time for them!

"YORUBA NATION / BIAFRA REPUBLIC JOINTS RALLY AT TRAFALGAR SQUARE, LONDON UK"
https://www.youtube.com/watch?v=II_zlUgTHh0
Ron``

``Thanks, Ron. And we remember that the Igbos had some clandestine transmissions not so long ago including Radio Biafra:
https://shortwavearchive.com/archive/radio-biafra
You probably have similar recordings.

And a decent signal into the U. Twente SDR receiver. At 1945, noted mentions of Yoruba and snippets of the Yoruba National Anthem.
-- Richard Langley``

And later, UT June 14:
``I only listened to it in the Yoruba language. The signal here for me is good.
https://youtube.com/shorts/O8xdCXpMu08?feature=share
https://youtube.com/shorts/rnSA7E7thUs?feature=share
73 Jorge Freitas``

Eric Fetters-Walp: ``I've been listening off and on since 2100 UT, when I could clearly detect a signal on 9890 out west here in Lake Stevens, Washington state, but only bits of audio every few moments. Starting around 2335, the audio has faded in enough to be consistently audible (music now as of 2340). The talking's no longer in English,

however; back to presumed Yoruba`` (Glenn Hauser, OK, WOR)

** NIGERIA [non]. Altho heard Sunday June 13 for hours and hours on 9890, R. Yoruba via Woofferton was missing Mon June 14; and also Tue June 15 when checked via UTwente at 2329. Meanwhile, explained June 15 with more about it from Alan Pennington, UK, on the WOR iog:

``Re: [WOR] [bdxc-news] New station broadcasting to Nigeria? This station seems to use the name "Radio Ominira Yoruba" ("Radio Freedom Yoruba" in English) on its Facebook page, set up on 3rd June.

On their Facebook page (Radio/Tv Ominira Yoruba) they posted yesterday (14 June) that broadcasts will be every Saturdays and Sunday on 9890 (so not daily, despite HFCC registration?):
"Tunein to Radio Ominira Yoruba on Shortwave Radio 9890KHz Frequency. Share this page with Yoruba citizens both Home and Diaspora. Listen to us every Saturday and Sunday from 20.00pm to 01.00am Nigeria time on (Shortwave Radio) Frequency 9890kHz SW."

So Saturday and Sundays 1900-0000 UT.
https://www.facebook.com/RadioTv-Ominira-Yoruba-109579721340076
73, Alan Pennington, Caversham, UK`` (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6960-AM, UT Sat June 12 at 0215, only pirate signal is here with music, S9-S8 presumably Ball Smacker Radio`s regular Friday night broadcast from 01 UT Sat (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6955-USB, June 13 at 0037, rock/soul music S9+10, suspect Wolverine Radio, and yes, quick IDs between tunes at 0111.5 and 0123.6. This week`s theme is songs with ``Me`` in the title, per monitored playlists at:
https://www.hfunderground.com/board/index.php/topic,82761.0.html
Still going past 0200 when it`s time for `Weekend Radio` on WCLV (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6974.930-AM, June 13 at 0103, weak pirate music, via W8BUG remote, S5 vs S7 storm crashes; with SAM reading -70 Hz offset from 6975.00; presumed Nowhere Radio as usual (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6955-USB, June 14 at 0213, rock music, somewhat distorted, and vs storm noise, S9; 0227 off or pause? 0231 on past 0246. Several reports here as unID, with SSTV but hard to decode on unstable frequency. One image shows ``UNID`` on a pirate flag!
https://www.hfunderground.com/board/index.php/topic,82835.0.html
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 7475, June 15 at 0416, Station YHWH is S8/S9+5 into Corinne, northern Utah SDR; tnx to tip from Eric Fetters-Walp in WA on

the WOR iog. Rick Barton, AZ, was also hearing it (Glenn Hauser, OK, WOR)

** OKLAHOMA. 255-MCW kHz, June 16 at 0613 UT, ND beacon SW in Stillwater is gone again. It had been regular whenever checked every night since it came back March 17 after a 5+ week absence. Still off at 1437 UT daytime check.

341-MCW kHz, June 16 at 1438 UT, ND beacon EI, Enid, is back! Can this be coincidental just when SW 255 has vanished? Had been gone since April 16. Checked every night. 25 watts only a few miles away, but a struggle to copy, tipped by presence of a carrier first (Glenn Hauser, Enid, WOR)

** OKLAHOMA. June 15 at 0510 UT I posted to the WTFDA gg:

``90.1 KUCO-FM OKC is stuck with legal IDs looping every 34 seconds, instead of WCPE overnight relay of classical music. First noted before 0540 UT June 15 and still going past 0600. A de facto MS DX test! Wake up, tune in if you have a clear channel, record, as this may go on all night. Also probably applies to satellites KBCW 91.9 and KCSC 95.9, all three mentioned in the ID. 73, Glenn Hauser, Enid`` --- a reply:

Neal [sic], Thanks for this tip on the impromptu FM DX Test! (Hey, wait—that's MY gig!) I'm recording overnight on 90.1 and running RDS Spy as well, hoping to log this one. Really appreciate the heads up. Fingers crossed. Everyone bear in my mind that meteor scatter is often best in the early morning hours up till about 10 AM. So don't stop rolling at sunrise. 73, Les Rayburn, N1LF, Maylene, AL 35114``

``Who`s Neal? This came from me, Glenn. KUCO tells me this ran until morning shift at 1000 UT. ``The tone controller has died``, i.e. low audio frequency cues from WCPE to insert local IDs. Will want to know if Les or anyone got it by MS. Glenn Hauser, OK``

And here`s my correspondence later with KUCO, Brad Ferguson, mgr.:

``Brad, Sorry to report that your automatic legal ID was looping every 34 seconds from before when I tuned in at 12:40 this morning, past 1:20 when I turned off. Had I awakened later I was set to check it again, but after 6:00 it was back to normal. I fear it ran like that most of the night. Obviously there is no one in downtown OKC overnight, but I would hope some of you had remote control access to take care of problems like that. Or a fail-safe to replace with local music, or something. Regards, Glenn Hauser, Enid``

``Yes, I got us back when I came in a little after 5:00. Chris thinks the tone controller has died so we will run tonight without our IDs

and he will come with his tester tomorrow. BF`` (Glenn Hauser, OK, WOR)

** OKLAHOMA. 90.1, June 16 at 0559 UT, KUCO-FM Edmond/OKC amid restored music relayed from The Classical Station, WCPE, foregoes its own ID and lets the WCPE + satellites station IDs come thru after low-frequency cue tone clearly audible on my radio speaker into my ears; as KUCO`s device is out for repair. As in previous report, yesterday, KUCO was looping nothing but its own IDs all night. Yet to learn of any MS DX of it following my tip (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 94.3, June 12 at 2055 UT, still June 13 at 0122, KLGB-LP Enid is dead air in $tereo but with static KLGB____ ID on RDS. I suppose it will be dead the entire weekend like it was May 29-30. If only they would also turn off carrier since tho LP it`s so close that DXing any adjacent 94.1 & 94.5 is tough, no chance on 94.3 itself (Glenn Hauser, Enid, WOR)

** SPAIN. 17855, June 10 after 2200, REE to NAm is holding up well; Thursday is a day skipping English, but what`s on in Spanish? `Amigos de la Onda Corta`, with the familiar voice of Antonio Buitrago, who got a promotion to run the station. I missed the first few minutes, but this edition is an interview about ``derecho de acceso`` at RTVE itself. It seems this is an issue about various groups getting airtime at the domestic public broadcaster; and there is now a bureaucratic procedure for making their case via a form on the website.

With `shortwave` in its name, this has been classified as a `DX` program, and the outro does mention DX among other topix, but as much as I have been familiar with it, axual DXing and SW have seldom been covered, rather media in the broadest sense. There is a huge archive of podcasts like all their other programs, 371 of these here with titles for each, not about SW or DX in the first two pages inspected:
https://www.rtve.es/alacarta/audios/amigos-de-la-onda-corta/
Most of them are a little too long to fit into 30-minute slots.

The page header shows airtimes, but altho in UT are obviously keyed for winter time, now one UT hour earlier than: ``Amigos de la onda corta --- Jueves a las 17.00 y 23.00 horas, viernes a las 02.00 horas y sábados a las 13.00 horas UTC``

I do notice that none of them including this one are to be found in the WWDXC A21 schedule of SWL/Media Programs in English, German, Spanish,
https://www.wwdxc.de/swl.pdf
(Glenn Hauser, OK, WOR)

** UGANDA [non]. 15170, Thu June 10 after 1500, NO signal from the

strange unID target broadcast seemingly via Romania; it was scheduled in HFCC to skip Wednesday, which it did, but to resume Thursday. What`s next on Friday+? (Glenn Hauser, OK, WORLD OF RADIO 2090)

** UGANDA [non]. 15170, Tune-in at 1454 Friday June 11 via UTwente, huge S9 jamming? of very rapid pulsing covering 15161-15184; by 1502 no sign of the Uganda service. It would be nice for someone to try to DF the jamming, TDOA or otherwise. And note when it go off, after 1530?

Both Ron Howard in CA and Walt Salmaniw in BC say they are not hearing anything on 15170, neither Uganda service nor jamming. Richard Langley, NB, agrees with my timing on recording of when the jamming stopped, so it`s obviously intentional interference, despite nothing to block today. Has IRRS moved somewhere else, or concluded tests; and then what?

``According to my recording using the U. Twente SDR receiver today (11 June), the jamming/interference stopped at about 1536:30 UT (based on recording start time in file name and file bit rate).
-- Richard Langley`` (Glenn Hauser, OK, WOR)

** UGANDA [non]. 15170, Sat June 12 at 1455, checking again for the ``non-clandestine`` political target broadcast, but still absent, while the ``jamming`` is already running again, as heard via UTwente.

Now I am not so sure it`s jamming or against Ugandan ex-show. For one thing, it`s doubtful opponents in Uganda could come up with such blockage on short notice. From the sound of it, could well be OTH radar invading SWBC band. Now it is not centered on 15170, but peaking closer to 15160 and audible all the way from 15140 to 15170. Victim now is 15150, R. Tamazuj via Madagascar. Noise still running past 1539, 1607, but off by next check 1658.

Has IRRS moved the Ugandans somewhere else? I`m too occupied with LRA36 et al. to bandscan for it, but HFCC still shows only 7290, 9510, 15170 and 15515 for ``Milano``; 15515 also at 1500-1530 Saturdays only which we should have checked, in Oromo instead of ``English`` on 15170:
http://hfcc.org/data/schedbyfmo.php?seas=A21&fmor=ANT
(Glenn Hauser, OK, WOR)

** UGANDA [non]. 15170, June 13 at 1508, no IRRS signal, no jamming or OTH radar in the area either, checking at UTwente. Ivo Ivanov notes that 15170 has been deleted from the NEXUS-IBA schedule; so, that`s that.

The Next Big Thing, which I had not heard yet, is on 9890, 19-24 UT except Sundays 21-22 only, 250 kW, 170 degrees from Woofferton, about Yoruba separatism in Nigeria. But Alan Roe was already hearing it this Sunday June 13 at 1925. Now so I have I, African music and talk mentioning Yoruba, at 1947; via UTwente (Glenn Hauser, OK, WOR)

** UGANDA [non]. 15170, the 1500-1530 target broadcast continues to be unheard; but see KASHMIR [non]

** U S A. As I am not getting any Es FM DX, despite 88+ MUF spixe here and there in the wrong spot, I drop to 28+ MHz for some 10-meter hambeacons, all relogs as in the WJ5O roster:

28204-CW, June 11 at 2005, W0WF/B VVV DE --- still/again at 2200 on the other rx.
``28.204 WØWF * SAINT CHARLES, MISSOURI # 20W, VERTICAL (*) Daylight New 16 June 14``

Around 2010 UT June 11 quite a few JBA beacons in the 28.2+ MHz area.

28284.8-CW, June 11 at 2013, VVV N9TNY/B EN51 PSE RST --- that would be about 579, stronger than the others JBA. Still/again at 2230 on the other rx.
``28.2848 N9TNY C GENEVA, ILLINOIS # 5W VERTICAL New 21 May 2020``

28224.5-CW, June 11 at 2020, K5GJR/B
``28.2245 K5GJR C CORPUS CHRISTI, TX # 5W, VERTICAL``

The R75 tunes up to 60 MHz but I don`t have a VHF antenna for it, just the same longwire for HF, MF and LF. I have a listen anyway at 2036 June 11, and hear a very chirpy CW signal on 50244 --- or is it just a birdie? I have lots of those on HF & VHF (Glenn Hauser, OK, WOR)

** U S A. Sporadic E MUF mostly below 88 MHz on June 15 but some spots higher; several bandchex here don`t get anything but Okies on openish 92.1, 92.9, etc. So I decide to settle for 10m ham beacons, most of which have been heard before, unlike hundreds of other CW in the WJ5O roster. I may not have copied full spiels beyond IDs.

28178.5, June 15 at 1921, DE WA4OTD/B CARMEL, IN --- NOT as listed:
``28.2788 WA4OTD C CARMEL, INDIANA # 5W, attic dipole New 19 Oct 2010`` --- again at 2058

28204, June 15 at 1925, W0WF/B VVV ---
``28.204 WØWF * SAINT CHARLES, MISSOURI # 20W, VERTICAL (*) Daylight New 16 June 14``

28203+, June 15 at 1927, VVV DE WB9O##/B K --- presumably this one:

``28.2033 WB9OTX C VERSAILLES, INDIANA # 5W, VERTICAL new 12 Aug 13 QSY from 28.299.5 3 Nov 15 temp QRT 12 Apr 20``

28236.5, June 15 at 1929, ten x E VVV W0KIZ/B DE COLORADO ---
``28.2365 WØKIZ C DENVER, COLORADO # 5W, 1/2 VERTICAL``

28271.3, June 15 at 1931, dash ------- DE W0RIO/B IN ---
``28.2715 WØRIO * BOULDER, COLORADO # 5W, E/W DIPOLE New 14 Nov 15 (*) AM & PM Greyline`` NEW, so more info from QRZ.com:
``W0RIO USA flag USA, GALEN F COOK, BOULDER, CO 80305-5723 USA
I'm experimenting with an FSCW beacon at 28.271.5 Mhz, signal reports are appreciated and can be sent to: cook-dcn (at) solorb.com``

28281, June 15 at 1936 and again at 2056, DE W8EH ---
``28.281 W8EH C MIDDLETOWN OHIO # 8W, GP VERTICAL``

28285, June 15 at 1937, VVV N9TNY/B ---
``28.2848 N9TNY C GENEVA, ILLINOIS # 5W VERTICAL New 21 May 2020``

28286.55, June 15 at 1938, WB0BIN alternating fast and slow
``28.2865 WBØBIN C SABIN, MINNESOTA # 7W, GP VERTICAL New 22 April 18``

28297, June 15 at 1942, unID; only US listed on exact 28297.0 is:
``28.297 NS9RC C HIGHLAND PARK, ILLINOIS # 5W, VERTICAL QTH Change 30 May 17``

28209.35, June 15 at 2253, VVV VVV VVV DE K7EMX/B ---
28.2093 K7EMX C KEARNS, UTAH # 3W,VERTICAL New 5 August 2016``

While I`m at it, with WWV in on 25000 at 1956, I scan for anything on the 12m band: 24950-USB at 1956, N9DX, who is per QRZ.com:
``N9DX USA flag USA, John R Higgins, CADOGAN, PA 16212, USA``
(Glenn Hauser, OK, WOR) see also UNIDENTIFIED

** U S A [and non]. WORLD OF RADIO 2089 monitoring: confirmed UT Thu June 10 at 0130 on WRMI 5010, S9/+10 into Bonaire SDR. As usually happens, the preacher preceding is too long, gets cut off for ID at 0129.5 before he can give his contact info, tsk.

WORLD OF RADIO 2090 contents: Antarctica, Australia, Benin, Canada, Chile, China, Cuba, Egypt, Greece. 1030 UT Wednesday WRMI 5850 to NW
2100 UT Wednesday WRMI 7780 to NE
2100 UT Wednesday WBCQ 7490v to WSW
2200 UT Wednesday WRMI 9955 [jammed?] to SSE
0130 UT Thursday WRMI 5010 to S

Full schedule including AM, FM, webcasts, satellite, podcasts:
http://www.worldofradio.com/radioskd.html

Our non-commercial broadcasts and website depend on voluntary support:
thanks this week to Dan Gerrelfinger, Cincinnati OH, for a
donation ``as a thank you and to keep things going`` to
Glenn Hauser, Box 1684, Enid OK 73702 USA; and comments:

``Dear Glenn, I wanted to thank you for your program and all the
hard work to pass along DX information to us. I know that you
have been doing it for years and years. It is a nice public service
and is really informative.`` And recommends FM DX-fishing in the car
from a large parking lot, where he heard an OKC station, KYIS 98.9.

One may also contribute via PayPal, not necessarily in US funds,
to woradio at yahoo.com (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2090 monitoring: confirmed first
SWBC, UT Friday June 11 at 0130 on WRMI 5850, VG; but usual System F

// 7780 is OFF! Still with antenna repair problems?

Also confirmed Fri June 11 at 2048 the 2030 on IRRS via Italia-AM, 918 kHz, Villa Estense, S9+25 into Nearby Noale KiwiSDR, but with higher local line noise level than initially. To completion at 2059 except for cutting off the last two syllables of ``disclaimer``.

Next:
0130 UT Saturday WRMI 9395 to NNW [should resume; fingers crossed]
1300 UT Saturday WRMI 15770 to NE
1300 UT Saturday Unique Radio NSW 3210-USB
1801 UT Saturday IRRS 7290-Bulgaria to WNW, 918-Italy
1930vUT Saturday WA0RCR 1860-AM
0300vUT Sunday   WA0RCR 1860-AM [nominal 0315; as late as 0400]
1100 UT Sunday   Unique Radio NSW 3210-USB
2000 UT Sunday   IRRS 918-Italy
2200vUT Sunday   WBCQ 6160v Area 51 to WSW
2230 UT Sunday   WRMI 9955 to SSE [new]
2300 UT Sunday   WRMI 7780 to NE
0030 UT Monday   WRMI 7730 to WNW
0230 UT Monday   WRMI 7780 to NE, 5800 to SSE

2100 UT Wednesday WRMI 7780 to NE
2100 UT Wednesday WBCQ 7490v to WSW
2200 UT Wednesday WRMI 9955 [jammed?] to SSE
0130 UT Thursday WRMI 5010 to S
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2090 monitoring: NOT confirmed UT Sat June 12 at 0130 on WRMI 9395 --- WOR has stayed on the System G skedgrid at this time since its first appearance 5 weeks ago, while some other program really took over for 4 weeks. But it, or something like it is still running this week. {later: WOR to start June 19}

Confirmed Saturday June 12 at 1300 on WRMI 15770, S7-S8 direct.

Also confirmed Sat June 12 at 1600 on WRN to N America webcast.
Next:

1801 UT Saturday IRRS 7290-Bulgaria to WNW, 918-Italy
1930vUT Saturday WA0RCR 1860-AM
0300vUT Sunday   WA0RCR 1860-AM [nominal 0315; as late as 0400]

2100 UT Wednesday WBCQ 7490v to WSW
2200 UT Wednesday WRMI 9955 [jammed?] to SSE
0130 UT Thursday WRMI 5010 to S
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2090 monitoring: confirmed Saturday June 12 from 1800:40 on IRRS 7290 via Bulgaria, via UTwente SDR, VG S9+15/25, and also trace on X 2 = 14580. Strange that both have same-pitch warble on their USB, evitable by LSB tuning. Does that mean it`s really also coming out of the 7290 transmitter rather than external QRM?

Also via Italia-AM, 918 kHz, Villa Estense, via nearby Noale SDR, running about 7 seconds ahead of 7290/UTw. Earlier: At 1754, 7290 had open carrier over Chinese showing 7289.999; *1757 cut on much bigger carrier as above. On 918, talk show in English interrupted to JIP Aïda theme at 1758.7, but on 7290, dead air to Aïda does not start until 1759.8; brief IRRS sign-on, several seconds pause before WOR start.

Also confirmed from 1939 Sat June 12 on WA0RCR, 1860-AM, MO via nearby KB0FX SDR.

Also confirmed UT Sun June 13 at 0321 about 5 minutes into so started about 0316 on WA0RCR, 1860-AM, MO, again via KB0FM remote. Next:

1100 UT Sunday   Unique Radio NSW 3210-USB

0230 UT Monday   WRMI 7780 to NE, 5800 to SSE

1030 UT Wednesday WRMI 5850 to NW
2100 UT Wednesday WRMI 7780 to NE
2100 UT Wednesday WBCQ 7490v to WSW
2200 UT Wednesday WRMI 9955 [jammed?] to SSE
0130 UT Thursday WRMI 5010 to S
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2090 monitoring: confirmed Sunday June 13 from 2000.6 in IRRS SW via Italia-AM, 918 kHz, Villa Estense, VG S9+25 via nearby Noale SDR, following IRRS ID claiming to be on SW in reduced-carrier USB, neither of which is correct.

Also confirmed Sun June 13 at 2219 the 2200, on Area 51 via WBCQ 6158.895 kHz, S6-S7 vs storm noise into Maryland SDR, SAM mode showing carrier offset minus 105 Hz. JBA carrier direct; also on the WBCQ webcast.

Also confirmed new time of Sun June 13 at 2230 on WRMI 9955, S8/S9+5 into Maryland SDR with heavy jamming; less so at Bonaire.

NOT confirmed Sun June 13 at 2300 on WRMI 7780, now replaced by something else per skedgrid.

Also confirmed UT Mon June 14 on WRMI 7730, VG direct.

Confirmed on Global Community Radio webcast just before finishing the 0100, at 0128 UT Mon June 14; but not on one of the stations which used to relay us, KPDO Pescadero CA, nor on their program sked.

Also confirmed UT Mon June 14 at 0130 on WRN webcast to N America.

Also confirmed UT Mon June 14 at 0230 on WRMIs: 5800, S9+20 direct; 7780 S9+10 direct, both vs heavy nearby storm noise, with 7780 unusually slightly better here. Next, not until Wednesday:

1030 UT Wednesday WRMI 5850 to NW
2100 UT Wednesday WRMI 7780 to NE
2100 UT Wednesday WBCQ 7490v to WSW
2200 UT Wednesday WRMI 9955 [jammed?] to SSE
0130 UT Thursday WRMI 5010 to S
(Glenn Hauser, OK, WOR)

1030 UT Wednesday WRMI 5850 to NW
2100 UT Wednesday WRMI 7780 to NE {confirmed}
2100 UT Wednesday WBCQ 7490v to WSW {confirmed}
2200 UT Wednesday WRMI 9955 [jammed?] to SSE {confirmed}
0130 UT Thursday WRMI 5010 to S

Full schedule including AM, FM, webcasts, satellite, podcasts:
http://www.worldofradio.com/radioskd.html

Our non-commercial broadcasts and website depend on voluntary support:
thanks this week to Dan Gerrelfinger, Cincinnati OH, for a
donation ``as a thank you and to keep things going`` to
Glenn Hauser, Box 1684, Enid OK 73702 USA.

One may also contribute via PayPal, not necessarily in US funds,
to woradio at yahoo.com (Glenn Hauser, OK, WOR)

** U S A. 5800, June 15 at 0627, S9+10/20 open carrier, once again
surely from WRMI which is the only station on 5800 earlier; late on a
Tuesday (Glenn Hauser, OK, WOR)

** U S A. (7489.9v webcast), UT Sat June 12 from 0000, WBCQ, `AAAWWW`,
semi-monitored; long discussion about drawbax of electric cars,
battery replacement problems; 0049 finally datestamp as 11th of June
YOOL 2021, and tomorrow June 12 will be Allan`s 68th birthday, to be
celebrated, but not narcissistically. In DeLand of Fla it`s 85
degrees, 60% humidity but Angela hates air-conditioning as unhealthy
but apparently has relented at the moment. 0055 quick items from Free
Radio Weekly just published, a few emails and over. Another week and
he has said nothing at all about the stalled WHRI purchase,
Super-Station problems, new frequencies? or any station/program
updates. Nor has he twitted anything significant last few weeks, just
checked. Over to John Carver`s version:

``Tonight's show started on time on 6160 and 7490 but between storm
noise and the het 6160 is difficult to copy. Allan and Angela in a
triple digit Fla. Angela's Angle starts early this evening with Angela
wondering why the push for green energy and electric cars when, in her
opinion the US pollutes less than anyone else in the world. Allan
takes the time to explain the pitfalls of electric cars. Then a
general discussion of power generation and usage. A tiny bit of dead
air at 0053. Reading of emails at 0055 with Allan doing an overview of
the latest Free Radio Weekly and then in to regular emails. Quick
closing prayer at 0059 and cut off at 0100. John, Mid-North Indiana``
(Glenn Hauser, OK, WOR)

** U S A. 9939.949, UT Sun June 13 at 0018, WTWW is active again on
this off-frequency only, with #2 programming while 5085 is off instead
of // as reported previously. During `Amateur Radio Newsline`, item
about a Bigfoot net in Oklahoma, Wednesdays at 20h CT on 7115. (A SE
county is promoting Bigfoot-hunts as a tourist attraxion.) After ARNL
I am expecting `TOUTA` but instead hard-sell ads, 0025 canned WTWW ID
disrespectfully with Our National Anthem clip as produxion music.

Unlike 5085, I can`t detect any JBA spurs about plus/minus 12.9 kHz, which is fortunate since they would het 9925 KBC and 9955 WRMI! So maybe this is the otherwise idle #3 transmitter? Nor during music does it sound distorted as 5085. 0027 classic rock, 0030 Atlas weather, still no TOUTA, so I check pirate band.

0042 recheck, now `Theater Organ Under the Arch` has just started late. Original S9+10/20 signal now going into some deep fades which would not be happening on 5 MHz band. I`ve switched to the $tereo non-fading webcast. At 0058 plays `Knightsbridge March` from London Suite  by Eric Coates, probably unaware it was the theme of HCJB`s `DX Partyline`; but quite a different arrangement. Here is a traditional orchestral performance, perhaps the very one HCJB used:
https://www.youtube.com/watch?v=E_YNW0dLy_I
TOUTA is usually a ~31-minute program, but chopped off at 0102 after only 20+ minutes! No compensation for the late start; tnx a lot, Ted. Cut to bible verse, ID, and then the all-important rock DJ with `International Happy Hour` (Glenn Hauser, OK, WOR)

** U S A. Sporadic E FM DX mostly eludes me; instead fringe KS/OK signals with deep Es-like fading due to turbulent high-temperature atmosphere. June 11 at 1626 UT on caradio, semi-open 92.3 says ``92.3 The Brand``. WTFDA FM DB gets no hits! but it`s surely only Wichita KS, and I have heard it just in time:

RadioInsight
https://radioinsight.com/headlines/209112/espn-wichita-92-3-the-fan-to-launch-june-14/

``ESPN Wichita 92.3 The Fan To Launch June 14
Lance Venta by Lance Venta June 4, 2021

ESPN Wichita 92.3 The Fan KKGQ Chad Boeger’s Pinnacle Media will launch Sports “ESPN Wichita 92.3 The Fan” KKGQ Newton/Wichita KS on Monday, June 14.

Boeger, who heads Union Broadcasting and its Sports stations in Kansas City and Louisville, acquired KKGQ from Rocking M Media for $623,000 in April. The deal helped settle the legal battle between Rocking M and Envision Broadcast Network dating to the 2017 merger of then-Envision owned KKGQ into Rocking M’s Wichita closer. Rocking M agreed to sell its entire cluster in 2019 to Allied Media Partners, however liens placed on the stations by Envision were unable to be cleared and Envision locked Rocking M Media out of their studios located at Envision’s headquarters leading to the sale collapsing. The former Red Dirt Country “Kansas Country 92.3” has been operating as Country “92.3 The Brand” when on the air since then.

The new format will create a format competitor to Audacy's 1240 KFH/97.5 K248CY. Shane Dennis, who had been co-hosting the 9-11am show on KFH, has jumped to KKGQ to host from 12-2pm. The KKGQ lineup will also feature simulcasts of two programs originating at Union's 810 WHB Kansas City. "The Border Patrol" with Steven St John, Nate Bukaty and Jake Gutierrez, which airs from 7-10am in Kansas City will see its final two hours air in Wichita. KKGQ will also carry the final half of "The Program with Brad Porter" from 4-6pm.

ESPN Radio programming including Keyshawn, JWill and Zubin from 5-8am, "Greeny" with Mike Greenberg from 10am-12pm, and Max Kellerman from 2-4pm will air in all other dayparts.``

Here`s a sesqui-year-old story about how messed up it was then:

``Carrie Rengers Have You Heard --- One Wichita-area Rocking M Media radio station is back on, but what about the others?

By Carrie Rengers
January 30, 2020 04:32 PM, Updated January 31, 2020 04:07 PM

The on-again, off-again KKGQ, 92.3-FM is on again, but Monte Miller apparently does not want to discuss it. "We put it back on the air is all," said the owner of Salina-based Rocking M Media...`` Read more here:

QRM was from Woodward OK talk station KMZE (Glenn Hauser, Enid, WOR)

UNIDENTIFIED. 25950, June 15 at 1954, open carrier with Es fading, prompting me to post:

``[WOR] Broadcast aux on 25-26 MHz --- Now at sporadic E peak, keep an ear out for broadcast auxiliaries in the 25-26 MHz band. Very little activity lately and most of these now in EiBi may well be off for a few years. Typically they are turned on only when needed, such as ``talkback`` during a remote event, so hosts may get non-delayed program audio.

Now around 2000 UT June 15, when WWV is also in on 25000, I have an open carrier on 25950, which once was used in Denver. Usually FM mode but without mod it may seem like AM. EiBi:

25870	0000-2400	USA WFLA Tampa, FL
25910	0000-2400	USA KLDE El Dorado, TX
25950	0000-2400	USA KGON Portland, OR
25950	0000-2400	USA KTCL Denver, CO
25990	0000-2400	USA KLDE El Dorado, TX

26100	0000-2400	USA KCCI Des Moines, IA
26110	0000-2400	USA KOVR-TV Sacramento, CA
26130	0000-2400	USA WIBC Indianapolis, IN
26450	0000-2400	USA WLW Cincinnati, OH

CB and freeband are loaded, lots of 10m beacons too. 73, Glenn``

Harold Frodge, Midland MI, replied, ``I've checked for these often but have not heard one for several years`` (Glenn Hauser, OK, WOR)
